INVENTOR : KUGE SATORU;

INT.CL. : H04N 5/44

TITLE : COMPOSITE VIDEO DEVICE

ABSTRACT : PURPOSE: To improve the operability of a composite video device composed of a receiver part with built-in-television tuner (hereinafter referred to as 'TV part') and a video tape recorder part (hereinafter referred to as 'VTR part').

CONSTITUTION: A VTR button 15 for VTR reproduction command is provided as the operation button of a TV part 1, and a control part 13 having a computer constitution is provided with a means performing the screen display of the reproduction output of the VTR part 1 on the TV part 1 by controlling a VTR part 2 to a reproduction by the operation of the VTR button 15, a means for stopping the reproduction of the VTR part 2 by the selecting station operation of the TV part 1 or the VTR part 2 during the reproduction of the VTR part 2 and switching the display screen of the TV part 1 to the reception screen of a selected channel, a means for controlling the VTR part 2 to the video recording of the channel in screen display on the TV part 1 by the video recording operation of the VTR part 2, and a means for prohibiting the change of a video recording channel by the selecting station operation of the TV part 1 or the VTR part 2 during the video recording of the VTR part 2 and controlling the channel of which the screen display on the TV part 1 is performed to the selected channel.
